

Serial No.: 09/893,662

IN THE ABSTRACT:

Please amend the abstract as follows:

~~This invention relates to a~~ A communication system for automation equipment (10) ~~on a TCP/IP network (50).~~ network. The automation equipment (10) controls an automation application by executing an application program (20) ~~written according to standard IEC1131-3. The communication system comprises~~ includes at least a reception WEB function block (21) ~~integrated into the application program (20) to implement a WEB server function function,~~ and/or at least one send WEB function block (22) ~~integrated into the application program (20) to implement a WEB client function~~ function, and an HTTP interface (15) ~~capable of routing messages between the TCP/IP network (50) and WEB function blocks identified by a URL address. The contents of HTTP requests may be an XML frame or a URL encoded frame.~~
